EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark G. Kachigian on 01/28/2009.

Claim 7, Line 8, "to each of the received transport streams" is replaced by "to each of the selected packets".

Claim 7, Line 10, "to each packet of data" is replaced by "to each of the selected packets of data"

Claim 7, Lines 11-13 are deleted.

Claim 7, Lines 14-16, "selecting the required data packet once the appropriate transport stream is identified therefrom with reference to the packet identification code allocated to each of the packets for that transport stream of data" is replaced by "further selecting the multiplexed data packets with reference to the packet identification code allocated to each of the selected packets of data for the multiplexed single stream of data".

Claim 7, Lines 17-19, "repeating the steps for each of the data packets required to form the single stream of data and wherein the provision of a transport stream identification code for each transport stream of digital data which is received differentiates" is replaced by "repeating the steps for each of the data packets required

to output a particular channel, wherein the allocating of the transport stream identification code for each of the selected packets of data which is received, differentiates”.

Allowable Subject Matter

Claims 1, 4 and 6-9 are allowed.

The following is an examiner's statement of reasons for allowance:

In regards to claims 1, 4 and 6, the prior art of record failed to anticipated or rendered obvious the combined steps/elements of “**each transport stream of data including transport packets provided with packet identification codes for the packets of data in the stream, and a transport stream identification code added to each of the transport packets at a position other than that of the packet identification code so as not to change the packet identification codes**”, as recited in the claims.

In regards to claims 7-9, the prior art of record failed to anticipated or rendered obvious the combined steps/elements of “**allocating a transport stream identification code to each of the selected packets of data**”, in conjunction with “**allocating a packet identification code to each of the selected packets of data**”, in further conjunction with “**wherein the transport stream identification codes are allocated at a position in the packet other than that of the packet identification code so as not to modify the packet identification codes**”, as recited in the claims.

Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The Examiner agrees with Applicant's arguments dated 11/03/2008 and further notes that the limitations of the transport stream identification code (TSID) allocated to the selected packets of data in addition to the packet identification codes (PIDs) allocated to the selected packets of data and that the TSID is assigned to an area of the packet other than the PID area of the packet, and that both the TSID and PID are used to identify the received single (re)multiplexed stream of data are not found in the prior art of record.

Conclusion
